

Jean-Paul van Staden

JUNIOR SOFTWARE DEVELOPER

Ann Arbor, MI • +1 (734) 373 3252 • jpvanstaden94@gmail.com

GitHub & project portfolio available on request

PROFILE

Self-taught developer with a 10-year background in business systems, structured data, and process automation, now transitioning into software development. Proficient in Python and web fundamentals through independent study and hands-on projects — including a business-process / ticketing system built end-to-end for a real employer use case. Applies SQL, Power BI / DAX, Power Query, and Python scripting daily with a detail-driven, analytical mindset. Microsoft Azure certified. Seeking a junior developer role to apply this foundation in real-world work.

TECHNICAL SKILLS

Languages: Python, JavaScript, HTML, CSS

Data & Query: SQL / T-SQL, DAX, Power Query

Tools & Platforms: Git / GitHub, Power BI, Advanced Excel, SAP, Microsoft Azure, MS Office

PERSONAL PROJECTS

BPM Ticketing System *Python*

- Designed and built a business-process-management / ticketing system end-to-end for a real employer use case — scoping business requirements and delivering ticket creation, tracking, and workflow logic from scratch.

Couples Budget Planner *Python · Web*

- Web-based budgeting application for couples to track and manage shared finances, including input handling and budget calculations.

Adaptive Auto-Clicker *Python*

- Configurable auto-clicker that adapts its behavior to the target application rather than firing on a fixed, static interval.

Snake Game *HTML · JavaScript*

- Browser-based, client-side recreation of the classic Snake game covering game-loop logic, collision detection, and keyboard input handling.

RELEVANT EXPERIENCE

Procurement Buyer

Aug 2025 – Jun 2026

SKG Properties | Centurion, South Africa

- Analyzed business data in SQL and Excel to surface insights and support decisions; streamlined and automated repetitive purchasing workflows.

IT Stock Controller

Nov 2023 – Dec 2024

First Technologies | Centurion, South Africa

- Built Power BI dashboards and Power Query reports to model and track stock data; managed and assembled computer hardware.

Earlier roles (2015–2023) in IT support, stock control, and IT procurement at Deltrolux, X-Technologies, Barloworld, and Salvage Management & Disposals — with Excel/SQL analysis, Power Query, Power BI reporting, and PC assembly.
